

Attachment 4

**INDEX AND LIST OF
TABLES AND FIGURES**

INDEX

	<i>Part</i>	<i>Paragraph</i>
A		
Abbreviations and symbols		
general.....	Foreword	—
as used in Table 3-1.....	3	2.1.2
Acceptance of dangerous goods		
acceptance check.....	7	1.3
cargo acceptance procedures.....	7	1.1
checklist.....	7	1.3
infectious substances — special responsibilities.....	7	1.5
freight containers and unit load devices.....	7	1.4
operators — general procedures.....	7	1.2
undeliverable consignments of radioactive material.....	7	1.6
Accessibility of 'Cargo aircraft only' packages.....	7	2.4.1
Accidents and incidents		
aircraft carrying dangerous goods — action by operator.....	7	4.6
dangerous goods — reporting by operators.....	7	4.4
dangerous goods — reporting by entities other than operators.....	1	7
accumulation of packages and freight containers of radioactive material.....	7	2.10.3.3
activity levels of radioactive material.....	2	7.2.2
Aerosols		
definition.....	1	3.1.1
divisions.....	2	2.5
flammable — criteria.....	2	2.5.2
packagings — requirements.....	6	3.2.7
subsidiary risks.....	2	2.5
Airmail.....	1	2.3
Air waybill.....	5	4.2
Aluminium boxes (4B)		
performance tests.....	6	4
specifications.....	6	3.1.13
Aluminium drums (1B1, 1B2)		
performance tests.....	6	4
specifications.....	6	3.1.2
Amendments to Technical Instructions.....	1	1.6
Animals		
infected.....	2	6.3.6
veterinary aid.....	1	1.1.5.1 b)
separation from radioactive materials.....	7	2.10.6.3
separation from toxic and infectious substances.....	7	2.9
with dry ice.....	7	2.12
Annex 18 — relationship.....	1	1.5
Applicability of the Technical Instructions.....	1	1.1
Application		
labels.....	5	3.2
markings.....	5	2.2
Approvals.....	1	1.1.2
B		
Bags, paper — specifications.....	6	3.2.4
Bags, paper, multiwall (5M1), multiwall water-resistant (5M2)		
specifications.....	6	3.1.17
Bags, paper with plastic/aluminium (IP.10) — specification.....	6	3.2.11
Bags, plastic — specification.....	6	3.2.5
Bags, plastic film (5H4)		
performance tests.....	6	4
specifications.....	6	3.1.16
Bags, textile (5L2, 5L3)		
performance tests.....	6	4
specifications.....	6	3.1.14

	<i>Part</i>	<i>Paragraph</i>
non-compliance	1	6.6
packagings		
requirements	6	7.2
target for drop tests	6	7.13
testing of integrity of containment system and shielding	6	7.12
test procedures	6	7.11
tests for normal conditions of transport	6	7.14
tests for accident conditions in transport	6	7.16
packing requirements	4	9.1
placarding of large freight containers	5	3.6
radiation levels for packages and overpacks	4	9.1
.....	5	1.2.3.1.4
registration of serial numbers	6	7.22
requirements for		
excepted packages	6	7.3
industrial packages	6	7.4
packages containing fissile material	6	7.10
packages containing Uranium hexafluoride	6	7.5; 7.20
Type A packages	6	7.6; 7.15
gases	6	7.6.17
liquids	6	7.6.16
Type B(M) packages	6	7.8; 7.17
Type B(U) packages	6	7.7; 7.17
Type C packages	6	7.9; 7.19
security	1	5.5
separation		
from film	7	2.10.6.2
from live animals	7	2.10.6.3
from persons	7	2.10.6.1
special form	2	7.2.3.3
surface contaminated object (SCO)		
determination of groups	2	7.2.3.2
requirements and controls for transport	4	9.2
transport index		
definition	2	7.1.3
determination	5	1.2.3
limits	4	9.1.9
exclusive use	7	2.10.3.4
Target for drops tests	6	7.13
Test procedures	6	7.11
Testing the integrity of the containment system and shielding and evaluating criticality safety	6	7.12
Tests for demonstrating ability to withstand accident conditions in transport	6	7.16
Tests for demonstrating ability to withstand normal conditions of transport	6	7.14
Transitional measures for Class 7	6	7.23
<i>Class 8 (Corrosive substances)</i>		
definition	2	8.1
packing group assignment	2	8.2
packing instructions	4	10
<i>Class 9 (Miscellaneous)</i>		
assignment	2	9.2
definition	2	9.1
lithium batteries — see Lithium batteries		
magnetized material — explanation	2	9.2.1 d)
packing instructions	4	11
Class hazard label specifications	5	3.5.1
Classification of organometallic substances	2	4.5
Classification of pesticides	2	6.2.4
Classification of substances and articles with multiple hazards	2	Introductory Chapter, 4
Clinical waste	2	6.3.5
Coated packagings — testing	6	4.1.9
Compatibility group assignment for explosives	2	Table 2-3
Composite packagings (plastic material) (6HA1, 6HA2, 6HB1, 6HB2, 6HC, 6HD1, 6HD2, 6HG1, 6HG2, 6HH1, 6HH2)		
performance tests	6	4
specifications	6	3.1.18
Consignee identification on packages	5	2.4.2
Contaminated baggage or cargo, suspected	7	3.3

	<i>Part</i>	<i>Paragraph</i>
Conversion factors for SI/Non-SI units	1	3.2.3
Corrosives — see Class 8		
Cushioning of inner packagings.....	4	1.1.10
 D		
Damaged packages		
inspection for	7	3.1
loading	7	3.1
radioactive material	7	3.2
Dangerous goods		
accident and incident reporting	7	4.4
definitions.....	1	3.1
excepted quantities.....	3	5
radioactive material	1	6.1.5
exceptions for the operator.....	1	2.2
forbidden on aircraft under any circumstance	1	2.1
in airmail	1	2.3
information required.....	5	4
in passengers' baggage	8	1.1
limited quantities.....	3	4
list of	3	Table 3-1
multiple hazards	2	Introductory Chapter, 4
not otherwise specified (n.o.s.).....	3	1.2.7
numerical list.....	Att. 1	Chapter 1
packed together.....	4	1.1.8; 1.1.9
transport document.....	5	4.1
Definitions (see also Nomenclature).....	1	3.1
Documentation for dangerous goods.....	5	4
Drums, aluminium (1B1, 1B2)		
performance tests.....	6	4
specifications	6	3.1.2
Drums, fibre (1G)		
performance tests.....	6	4
specifications	6	3.1.6
Drums, metal other than aluminium or steel (1N1, 1N2)		
performance tests.....	6	4
specifications	6	3.1.3
Drums, plastic (1H1, 1H2)		
performance tests.....	6	4
specifications	6	3.1.7
Drums, plywood (1D)		
performance tests.....	6	4
specifications	6	3.1.5
Drums, steel (1A1, 1A2)		
performance tests.....	6	4
specifications	6	3.1.1
 E		
Earthenware, glass or wax receptacles (IP.1) — specifications.....	6	3.2.1
Emergency response information	7	4.9
Environmentally hazardous substances		
marking requirements.....	2	9.2
Excepted packages of radioactive material	5	2.4.9
Excepted quantities of dangerous goods	1	6.1.5
Exceptions	3	5
dangerous goods of the operator	1	2.2
general.....	1	1.1.5
Exemptions — granting of.....	1	1.1.3
Explanation of terms	Att. 2	—
Explosives — see Class 1		

	Part	Paragraph
F		
Fibreboard boxes (4G)		
performance tests	6	4
specifications	6	3.1.11
Fibre cans or boxes — specifications	6	3.2.6
Fibre drums (1G)		
performance tests	6	4
specifications	6	3.1.6
Fissile material — see Class 7		
Flammable aerosols — criteria	2	2.5.2
Flammable liquids — see Class 3		
Flammable solids — see Class 4		
Flammable viscous substances with a flash point less than 23°C — grouping	2	3.2.2
Flash point determination	2	3.3
Flight deck — loading restrictions	7	2.1
Forbidden dangerous goods		
under any circumstance	1	2.1
Format of packing instructions	4	2
Freight containers for radioactive material		
loading	7	2.10.3.3
placarding	5	3.6
Frequency of testing of packagings	6	4.1
G		
Gas cylinders	6	5
Gases — hazard precedence	2	2.3
Gases, refrigerated liquefied — packaging	6	5
Gases — see Class 2		
Generic proper shipping names, List of	Att. 1	Chapter 2
Genetically modified micro-organisms and organisms	2	6.3.4; 9.1.2
Glass — specifications	6	3.2.1
H		
Handling and loading of packages containing liquid dangerous goods	7	2.3
Handling labels	5	3.5.2
Cargo Aircraft Only label	5	3.2.12 a)
Cryogenic Liquid label	5	3.2.12 c)
Keep Away from Heat label	5	3.2.12 d)
Lithium Battery Handling label (PI 965-PI 970)	5	3.5.2.1
Magnetized Material label (Table 3-1; PI 953 and PI 962 (for UN 3363 if applicable))	5	3.2.11
Package Orientation label (PI 962 (for UN 3363) and PI Y963 (for ID 8000))	4,5	1.1.13; 3.2.12 b)
Radioactive material, excepted package	5	3.2.12 e)
Helicopters		
Information to the pilot-in-command	7	4.1.1
Special provisions for	7	7
I		
ID number	1	3.1
Incidents — see Accidents and Incidents		
Incompatible dangerous goods		
packing together	4	1.1.8
segregation	7	2.2.1
Index of packaging specifications	6	1.3
Industrial packages for radioactive material	6	7.4
Infectious substances — see Class 6		
Information, provision of		
by operator after an aircraft accident or incident	7	4.6
by pilot-in-command in an in-flight emergency	7	4.3
cargo acceptance areas	7	4.8
dangerous goods not required to appear in the information to the pilot-in-command	7	Table 7-9
emergency response	7	4.9

	<i>Part</i>	<i>Paragraph</i>
for helicopter operations	7	4.1.1
for lithium batteries	7	4.1.3
to operator's employees	7	4.2
to personnel with responsibilities for operational control of the aircraft	7	4.1.1 b)
to pilot-in-command	7	4.1
Inner packagings		
specifications	6	3.2
use of cushioning and absorbent materials	4	1.1.10; 1.1.11
Inspection for damage or leakage	7	3.1
 J		
Jerricans, plastic (3H1, 3H2)		
performance tests	6	4
specifications	6	3.1.7
Jerricans, steel (3A1, 3A2)		
performance tests	6	4
specifications	6	3.1.4
 L		
Labels and labelling		
application of labels	5	3.2
labelling of packages and overpacks	5	3
labelling of unit load devices	7	2.8
other modes of transport	5	3.2.13
prohibited labelling	5	3.4
replacement of labels	7	2.7
requirement to label	5	3.1
specifications for labels	5	3.5
Languages to be used		
dangerous goods transport document	5	4.1.6.3
labels	5	3.2.12
markings on packages	5	2.5
Leakage — inspection for	7	3.1
Leaking packages of radioactive material	7	3.2
Limitation of dangerous goods on aircraft	1	2
Limited quantities of dangerous goods	3	4
Liquid dangerous goods		
definition	1	3.1
loading	7	2.3
orientation of combination packagings	4	1.1.13
List of currently assigned organic peroxides	2	5.3.2.4; Table 2-7
List of currently assigned self-reactive substances	2	Table 2-6
List of dangerous goods	3	Table 3-1
of n.o.s. and generic proper shipping names	Att. 1	Chapter 2
Lithium batteries		
assignment	2	9.3
in airmail	1	2.3.2
packing instructions	4	11
quality management system	2	9.3.1 e)
Loading		
cargo aircraft	7	2.4.1
dry ice	7	2.12
expandable polymeric beads	7	2.13
magnetized material	7	2.11
restrictions on flight deck and for passenger aircraft	7	2.1
segregation from other dangerous goods	7	2.2.1
Low specific activity radioactive material — see Class 7		

	<i>Part</i>	<i>Paragraph</i>
M		
Magnetized material		
definition	2	9.2 d)
loading	7	2.11
Markings		
application of	5	2.2
biological substances, Category B	5	2.4.8
Class 1 packages	5	2.4.3
dry ice	5	2.4.7
infectious substances	6	2.2
marking requirements	5	2.4.5
languages to be used	5	2.5
other modes of transport	5	2.4.13
packages and overpacks	5	2.4.10
packaging specifications		
detailed requirements	6	2
general	5	2.4.4
prohibited	5	2.3
proper shipping name and UN number	5	2.4.1
radioactive material requirements	5	2.4.5
refrigerated liquefied gas	5	2.4.6
shipper and consignee identification	5	2.4.2
special marking requirements for:		
biological substances, Category B	5	2.4.8
chemical oxygen generators	5	2.4.14
dry ice	5	2.4.7
environmentally hazardous substances	5	2.4.9; 2.4.15
explosives	5	2.4.3
IBCs used to transport UN 3077	5	2.4.9; 2.4.15
radioactive material	5	2.4.5
refrigerated liquefied gas	5	2.4.6
specifications and requirements	5	2.4
Measurement units and conversion factors	1	3.2
Medical waste	2	6.3.5
Mercury barometer, with government official	8	1.1.2 22)
Metal cans, tins or tubes — specifications	6	3.2.3
Metal or plastic flexible tubes — specifications	6	3.2.9
Miscellaneous dangerous goods — see Class 9		
Mixtures and solutions containing one dangerous substance	3	1.3
Mixtures of gases	2	2.4
Multiple hazard dangerous goods — classification	2	Introductory Chapter, 4
N		
Natural wood boxes (4C1, 4C2)		
performance tests	6	4
specifications	6	3.1.8
Non-SI units of measurement	1	3.2.2
Not otherwise specified (n.o.s.) dangerous goods		
list	Att. 1	Chapter 2
rules for use	3	1.2.7
O		
Operator		
acceptance check	7	1.3
acceptance of dangerous goods	7	1
acceptance of infectious substances	7	1.5
decontamination of aircraft	7	3
inspection of packages		
on acceptance	7	1
on unloading	7	3.1.3
prior to loading	7	3.1
loading	7	2

	Part	Paragraph
provision of information	7	4
responsibilities	7	—
Opening of dangerous goods packages	1	1.3
Organic peroxides		
additional transport document information	5	4.1.5.4; 4.1.5.8.3
Keep Away from Heat label	5	3.2.12 d)
Organic peroxides, list of currently assigned	2	Table 2-7
Organic peroxides — see Class 5		
Orientation of combination packages containing liquids	4	1.1.13
Overpacks		
labelling	5	3.3
marking	5	2.4.10
Oxidizing substances — see Class 5		
 P		
Packages and packagings		
aerosol dispensers	6	5
compatibility of parts of packagings	4	1.1.3.1
cylinders and closed cryogenic receptacles	6	5
empty	4	1.1.15
gas cartridges	6	5
minimum size	4	1.1.14
orientation of combination packages containing liquids	4	1.1.13
performance and frequency of tests	6	4.1
preparation for tests	6	4.2
pressure testing of packagings for liquids	4	1.1.6
salvage	4	1.4
additional information on dangerous goods transport document	5	4.1.5.1 d)
test requirements	6	4.8
specification markings		
detailed requirements	6	2
general	5	2.4.4
specifications and tests	6	—
specifications index	6	1.3
supplementary packagings — use of	4	1.1.7
testing requirements	6	4
test report	6	4.7
transitional arrangements for radioactive material	4	1.3
Packing group		
Class 1	4	3.1
criteria for Class 3	2	3.2
criteria for Class 8	2	8.2
criteria for Division 4.1	2	4.2.2.3
criteria for Division 4.2	2	4.3.3
criteria for Division 4.3	2	4.4.3
criteria for Division 5.1	2	5.2.2.2
criteria for Division 5.2	4	7.1.1
criteria for Division 6.1	2	6.2.2
explanation	4	Note 1
performance requirement	4	1.2
Packing instructions		
Class 1	4	3.4
Class 2	4	4.2
Class 3	4	5.1
Class 4	4	6.2
Class 5	4	7.2
Class 6	4	8.1
Class 8	4	10.1
Class 9	4	11
format	4	2
Packing requirements		
compatibility	4	1.1.3
excepted quantities	3	5.2
explosives	4	3.2
general	4	1.1
limited quantities	3	4.2
organic peroxides	4	7.1

	Part	Paragraph
self-reactive substances	4	6.1
Packing together of different dangerous goods	4	1.1.8
Paper bags — specifications	6	3.2.4
Paper bags, multiwall, water-resistant (5M2)		
performance tests	6	4
specifications	6	3.1.17
Passenger aircraft — loading restrictions	7	2.1
Passengers		
check-in procedures	7	5.2
permitted dangerous goods in baggage, etc.	8	1.1.2
provision of information to	7	5.1
Pesticides — classification	2	6.2.4
Placarding of large freight containers containing radioactive material	5	3.6
Placarding of portable tanks	5	Ch. 3, Note 3
Plastic — specifications	6	3.2.2
Plastic bags — specifications	6	3.2.5
Plastic boxes (4H1, 4H2)		
performance tests	6	4
specifications	6	3.1.12
Plastic drums (1H1, 1H2)		
performance tests	6	4
specifications	6	3.1.7
Plastic fabric bags — see woven plastic bags		
Plastic film bags (5H4)		
performance tests	6	4
specifications	6	3.1.16
Plastic flexible tubes — specifications	6	3.2.9
Plastic jerricans (3H1, 3H2)		
performance tests	6	4
specifications	6	3.1.7
Plastic receptacles (aerosols) non-refillable (IP.7C) — specifications	6	3.2.8
Plastic receptacles with outer protection (6HA1, 6HA2, 6HB1, 6HB2, 6HC, 6HD1, 6HD2, 6HG1, 6HG2, 6HH1, 6HH2)		
performance tests	6	4
specifications	6	3.1.18
Plywood boxes (4D)		
performance tests	6	4
specifications	6	3.1.9
Plywood drums (1D)		
performance tests	6	4
specifications	6	3.1.5
Poisons — see Class 6		
Portable tanks	4	Introductory Chapter, Note 6
Precedence of hazards	2	Introductory Chapter, 4
Pressure requirements for liquid containers		
all classes except Class 7	4	1.1.6
consumer commodities	4	PI Y963
Division 6.2	4	PI 620
Pressure testing of packagings for liquids	4	1.1.6
Pressure variations in air transport	4	Introductory Chapter, Note 3
Prohibited labelling	5	3.4
Prohibited markings on packages	5	2.3
Proper shipping name and UN number	3	1.2
Provision of information — see Information, provision of		
Provisions, special	3	3
Pyrophoric substances — see Class 4		
 R		
Radioactive material — see Class 7		
Readily combustible solids — see Class 4		
Reconstituted wood boxes (4F)		
performance tests	6	4

	Part	Paragraph
specifications	6	3.1.10
Refrigerated liquefied gases — packaging	6	5
Replacement of labels	7	2.7
Reporting of dangerous goods accidents and incidents		
by operators	7	4.4
by entities other than operators	1	7
Reporting of dangerous goods occurrences	7	4.6
Reporting of undeclared or misdeclared dangerous goods		
by operators	7	4.5
by entities other than operators	1	7
 S		
Samples, transport of	2	Introductory Chapter, 5
Salvage packagings, see Packages and packagings, salvage		
Securing of dangerous goods	7	2.4.2
Security of dangerous goods		
general	1	5.1
high consequence dangerous goods	1	5.3
security plans	1	5.4
training	1	5.2
Segregation of incompatible dangerous goods	7	2.2
Self-heating substances — see Class 4		
reactive substances		
list of currently assigned	2	Table 2-6
transport document	5	4.1.5.5
Shipper		
documentation	5	4
labelling	5	3
marking	5	2
requirements		
general	5	1.1
responsibilities	5	—
SI units and conversion factors	1	3.2
Special form radioactive material — see Class 7		
Special Marking — see Markings		
Special provisions	3	3
Specification markings for packages and packagings — see Packages and packagings		
Spontaneous combustion substances — see Class 4		
Steel boxes (4A)		
performance tests	6	4
specifications	6	3.1.13
Steel drums (1A1, 1A2)		
performance tests	6	4
specifications	6	3.1.1
Steel jerricans (3A1, 3A2)		
performance tests	6	4
specifications	6	3.1.4
package of toxic and infectious substances	7	2.9
stances which, in contact with water, emit flammable gases — see Class 4		
Supplement to the Technical Instructions	Foreword	—
Supplementary packaging	4	1.1.7
Surface contaminated object (SCO) — see Class 7		
 T		
Technical Instructions		
general basis for	Foreword	—
operational use of	Foreword	—
use of	Foreword	—
variations from

Table 6-2	Index of packagings other than inner packagings..... 6-1-2
Table 6-3	Index of inner packagings..... 6-1-4
Table 6-4	Tests required for packaging types..... 6-6-3
Table 6-5	Insulation data..... 6-7-5
Table 6-6	Free drop distance for testing packages to normal conditions of transport..... 6-7-9
Table 7-1	Segregation between packages..... 7-2-1
Table 7-2	Separation of explosive substances and articles..... 7-2-2
Table 7-3	Minimum distance from surface of packages, overpacks and freight containers of radioactive material to the nearest inside surface of passenger cabin or flight deck partitions or floors, irrespective of carriage duration..... 7-2-5
Table 7-4	Minimum distance from surface of packages, overpacks and freight containers of radioactive material, carried by cargo aircraft only, to the nearest inside surface of the flight deck partitions or floor, or other areas occupied by personnel, irrespective of carriage duration..... 7-2-6
Table 7-5	Aircraft activity limits for LSA material and SCO in industrial packages..... 7-2-7
Table 7-6	Transport index limits for freight containers and aircraft not under exclusive use..... 7-2-7
Table 7-7	Critical Safety Indexes limits for freight containers and aircraft containing fissile material..... 7-2-7
Table 7-8	Minimum distance in metres from surface of each package, overpack or freight container of radioactive material to undeveloped photographic films or plates, for carriage lasting up to 48 hours..... 7-2-8
Table 7-9	Dangerous goods not required to appear in the information to the pilot-in-command..... 7-4-2
Table 8-1	Provisions for dangerous goods carried by passengers or crew..... 8-1-1
Table A-1	State variations..... A3-1-2
Table A-2	Operator variations..... A3-2-3

LIST OF FIGURES

	<i>Page</i>
Figure 2-1	Criteria for inhalation of vapours 2-6-3
Figure 3-1	Limited quantities mark 3-4-3
Figure 3-2	Excepted quantities mark 3-5-3
Figure 5-1	Basic trefoil symbol with proportions based on a central circle of radius X. The minimum allowable size of X must be 4 mm..... 5-2-3
Figure 5-2	Symbol (fish and tree): black on white or suitable contrasting background..... 5-2-4
Figure 5-3	Explosive, Class 1, Divisions 1.1, 1.2 and 1.3 (label illustration)..... 5-3-5
Figure 5-4	Explosive, Class 1, Division 1.4 (label illustration)..... 5-3-6
Figure 5-5	Explosive, Class 1, Division 1.5 (label illustration)..... 5-3-6
Figure 5-6	Explosive, Class 1, Division 1.6 (label illustration)..... 5-3-7
Figure 5-7	Flammable gas, Class 2, Division 2.1 (label illustration) 5-3-7
Figure 5-8	Non-flammable, non-toxic gas, Class 2, Division 2.2 (label illustration) 5-3-8
Figure 5-9	Toxic gas, Class 2, Division 2.3 (label illustration)..... 5-3-8
Figure 5-10	Flammable liquid, Class 3 (label illustration)..... 5-3-9
Figure 5-11	Flammable solid, Class 4, Division 4.1 (label illustration)..... 5-3-9
Figure 5-12	Substance liable to spontaneous combustion, Class 4, Division 4.2 (label illustration) 5-3-10
Figure 5-13	Substance which, in contact with water, emits flammable gas, Class 4, Division 4.3 (label illustration)..... 5-3-10
Figure 5-14	Oxidizing substance, Class 5 (label illustration)..... 5-3-11
Figure 5-15	Organic peroxide, Class 5, Division 5.2 5-3-11
Figure 5-16	Toxic substance, Class 6, Division 6.1 (label illustration) 5-3-12
Figure 5-17	Infectious substance, Class 6, Division 6.2 (label illustration) 5-3-12
Figure 5-18	Radioactive material, Class 7, Category I (label illustration) 5-3-13
Figure 5-19	Radioactive material, Class 7, Category II (label illustration) 5-3-13
Figure 5-20	Radioactive material, Class 7, Category III (label illustration) 5-3-13
Figure 5-21	Criticality safety index label..... 5-3-14
Figure 5-22	Corrosive, Class 8 (label illustration)..... 5-3-15
Figure 5-23	Miscellaneous dangerous goods, Class 9 (label illustration)..... 5-3-15
Figure 5-24	Magnetized material (label illustration)..... 5-3-16
Figure 5-25	Cargo aircraft only (label illustration)..... 5-3-16
Figure 5-26	Package orientation (label illustration) 5-3-17
Figure 5-27	Radioactive material, Class 7, placard for large freight containers 5-3-18
Figure 5-28	Cryogenic liquid label 5-3-19
Figure 5-29	Keep away from heat 5-3-20
Figure 5-30	Radioactive material, excepted package 5-3-21
Figure 5-31	Lithium battery handling label 5-3-22
Figure 6-1	Cylindrical steel rod used for puncture test..... 6-6-5
