## FOREWORD

### RELATIONSHIP TO ANNEX 18 TO THE CHICAGO CONVENTION

The broad principles governing the international transport of dangerous goods by air are contained in Annex 18 to the Convention on International Civil Aviation — *The Safe Transport of Dangerous Goods by Air*. These Technical Instructions amplify the basic provisions of Annex 18 and contain all the detailed instructions necessary for the safe international transport of dangerous goods by air. Interested persons may purchase copies of Annex 18 from ICAO at the following address:

- ≠ International Civil Aviation Organization  
Customer Services Unit  
999 University Street, Montréal, Quebec, Canada, H3C 5H7  
Tel.: +1 514-954-8022  
Fax: +1 514-954-6769  
Email: sales@icao.int  
Internet home page: www.icao.int

### VARIATIONS FROM THE TECHNICAL INSTRUCTIONS

In accordance with the provisions of Annex 18, 2.5, Contracting States are required to notify ICAO of those cases where they have adopted provisions different from those contained in these Instructions. The variations which have been notified by States are listed in Attachment 3, together with notified variations from airline operators.

### UPDATING PROCEDURE

It is intended that the Technical Instructions be kept up to date by an ICAO body of experts. For this purpose, the ICAO Dangerous Goods Panel will continue to meet periodically to review comments received from States and interested international organizations, to consider any changed recommendations of the United Nations Subcommittee of Experts on the Transport of Dangerous Goods or the International Atomic Energy Agency, and to prepare revised editions of the Technical Instructions. Amendments recommended by the Dangerous Goods Panel will be reviewed by the Air Navigation Commission. The Council of ICAO will then consider, with a view to approval, the amended version of the Technical Instructions and authorize its publication. Amendments will be made available on [www.icao.int/anb/fls/dangerousgoods](http://www.icao.int/anb/fls/dangerousgoods).

### OPERATIONAL USE OF THE TECHNICAL INSTRUCTIONS

- ≠ This edition of the Technical Instructions is required to be used for operations from 1 January 2013 and will remain valid until 31 December 2014 or until such later time as a new edition becomes valid.

### GENERAL PRINCIPLES USED IN DEVELOPING THE PROVISIONS OF THE TECHNICAL INSTRUCTIONS

Dangerous goods can be carried safely by air transport providing certain principles are adopted. These principles have been used in developing these Technical Instructions and are set out below; they are intended to facilitate transport while giving a level of safety such that dangerous goods can be carried without placing an aircraft or its occupants at risk, providing all the requirements are fulfilled. They try to ensure that should an incident occur it cannot lead to an accident.

In general, dangerous goods are divided into various classes or divisions according to the hazard they present. A detailed list of individual commodities is shown which indicates the class or division into which each commodity falls as well as its acceptability for transport by air and under what conditions. Since such a list cannot be exhaustive, it also includes various generic or "not otherwise specified" entries to assist in the transport of those commodities not specifically listed by name.

Some dangerous goods are identified as too dangerous ever to be carried on any aircraft; some are forbidden in normal circumstances but may be carried with specific approval from the States concerned; some are restricted to carriage only on all-cargo aircraft; but most may be carried on both passenger and all-cargo aircraft, subject to meeting the required conditions. Those restricted to all-cargo aircraft are either in larger quantities than allowed on passenger aircraft or are forbidden on such aircraft; their transport is permitted due to their being usually accessible in flight and to the ability of the flight crew to consider a greater range of actions in an emergency than is possible on passenger aircraft.

The provisions are based on material produced by the United Nations, which is contained in the Recommendations on the Transport of Dangerous Goods (ST/SG/AC.10/1), the Recommendations on the Transport of Dangerous Goods: Tests and Criteria (ST/SG/AC.10/11), and, for radioactive materials, the International Atomic Energy Agency Regulations for the Safe Transport of Radioactive Material (TS-R-1 (ST-1, Revised)). Using a United Nations system ensures compatibility between the international modes of transport so a consignment may be carried by more than one mode without intermediate reclassification and repacking. Modifications are made to the system to take account of the peculiarities of air transport, while keeping in mind the need to ensure modal compatibility.

There are packing requirements of a general nature and packing instructions which, together, are intended to ensure that the safety of dangerous goods in air transport is assured by their packagings and the way in which they are packed. The packing requirements apply in almost all circumstances; the packing instructions mostly use UN packagings but sometimes these are not required, for instance when dangerous goods are in limited quantities. There is usually a wide choice of inner and outer packagings and single packagings are often permitted; sometimes, however, very restrictive packagings or only one or two types are permitted, or triple packagings are required. Generally, the quantity which can be put into an inner packaging and a complete package is strictly controlled. This is to minimize the inherent risk presented by the dangerous goods so that if an incident should occur, the situation would not produce an unacceptable hazard or lead to injury or major property damage.

After dangerous goods have been packed, the packages are marked with essential information, including the proper shipping name and UN number, and labels depicting all the potential hazard(s) of the contents are affixed. This is to ensure packages containing dangerous goods can be recognized and warning given of the potential hazard(s) without relying on information on accompanying documents. A dangerous goods transport document accompanies most consignments to provide detailed information about the goods so that, if required, there is a separate means of identifying the contents of packages.

There is generally no restriction on the number of packages of dangerous goods which can be loaded on an aircraft but there are provisions for their stowage. Incompatible dangerous goods are segregated and most are separated from passengers. The pilot-in-command is informed of what is on board an aircraft since, among other things, in an emergency the dangerous goods need to be considered when deciding on action. If an in-flight emergency does occur, the pilot-in-command needs to convey information to the air traffic services, in order to aid the response to such an accident or incident. In the event of an accident or incident, information is provided by the operator to the relevant authority as quickly as possible so as to ensure that any hazard arising from damage to the dangerous goods is minimized.

Dangerous goods accidents and incidents have to be reported so that an investigation by a relevant authority can establish the cause and take action to prevent a recurrence, wherever possible. In particular, any weakness or error in the Technical Instructions has to be identified.

Training is an important aid to achieving an understanding of the philosophy and requirements of the Technical Instructions. There is a need for everyone concerned to receive training on the subject either for general familiarization or to provide detailed knowledge, so that the responsibilities of the individual can be met. Dangerous goods are very unlikely to cause a problem when they are prepared and handled in compliance with the Technical Instructions.

## USE OF THE TECHNICAL INSTRUCTIONS

- ≠ The Technical Instructions are divided into eight Parts and four Attachments, with each Part and Attachment divided into Chapters and each Chapter divided into paragraphs and subparagraphs.
- ≠ Within each Chapter, the Chapter number is incorporated into all of the paragraph numbers; thus, in Chapter 3, paragraph 2 carries the number "3.2". When referring to a paragraph, it is necessary to identify the appropriate Part or Attachment; if the above example were located in Part 2, the reference to it would be shown as "2;3.2" (that is, Part 2; Chapter 3, paragraph 3.2). If the above example were located in Attachment 3, the reference would be shown as "A3;3.2" (that is, Attachment 3; Chapter 3, paragraph 3.2).
- ≠ Figures and Tables are numbered sequentially within the Part or Attachment in which they appear. Thus, the second figure appearing in Part 4 is identified as "Figure 4-2" and the first table appearing in Part 3 is identified as "Table 3-1". The first table appearing in the Attachments is identified as "Table A-1".

Use of the Technical Instructions will be facilitated by reference to the detailed Index in Attachment 4.

The detailed content of the Technical Instructions gives all the necessary provisions to enable a consignment of dangerous goods to be correctly prepared for air transport. However, to assist the user of this document, the following step-by-step procedure is given for guidance to ensure all the applicable requirements for classifying, packing, labelling, marking and documenting are met.

It should be noted that the information given below is for guidance only and the relevant sections should be checked to ascertain their relevance to each consignment.

1. Determine the correct technical name or composition of the substance or the description of the article.
2. Ascertain whether the name or composition of the substance or article appears in Table 3-1 and if so what is the proper shipping name.

3. If the substance or article does not appear in Table 3-1, determine the class or division into which it falls by comparing its known properties with the definitions for the various classes, which are given in Part 2, Chapters 1 to 9. If the properties are not known, tests should be carried out to determine the appropriate class or division. If the article or substance is not listed by name in Table 3-1 and does not meet the definition of any of the classes, it is not subject to these requirements for the transport of dangerous goods. For substances or articles with multiple hazards, the provisions of Part 2, Introductory Chapter should be followed. Once all the properties of the substance or article are known, determine whether it is forbidden for transport under any circumstance according to the provisions of 1;2.1. If the substance or article does not come within the provisions of 1;2.1, determine the proper shipping name from the most appropriate of the n.o.s. entries in Table 3-1. Information on n.o.s. entries is given in Part 2, Introductory Chapter.
4. If it is desired to transport the substance or article under the provisions for excepted quantities, all the requirements of 3;5 must be met. The substance or article will then not be subject to any of the other requirements of the Technical Instructions other than those listed in 3;5.1.1.
5. If it is desired to transport the substance or article under the provisions for limited quantities, all the requirements of 3;4 must be met and also all the applicable requirements of the Technical Instructions, except where otherwise provided for in 3;4.
6. If the substance or article is not to be transported as an excepted quantity or a limited quantity, determine whether it is desired to transport it on passenger or cargo aircraft.
7. From the information given in columns 10 to 13 of Table 3-1, ascertain whether or not the substance or article is forbidden for transport on passenger aircraft or on both passenger and cargo aircraft.
8. If the substance or article is shown as forbidden for transport on either passenger aircraft or both passenger and cargo aircraft, ascertain whether it could be subject to an exemption under the provisions of 1;1.1.2, by consulting the appropriate national authority. If the substance or article is forbidden for transport on passenger aircraft, determine whether it can be transported on cargo aircraft.
9. If it is desired to transport the substance or article on passenger aircraft and this is not forbidden and the quantity per package does not exceed the permitted maximum net quantity per package given in column 11 of Table 3-1, determine the packing instruction number, quantity limitation, special provisions and any State or operator variations as shown in Tables 3-1 and 3-2 and Attachment 3.
10. If it is desired to transport the substance or article on a cargo aircraft or if it can only be carried on such aircraft, determine the packing instruction number, quantity limitation, special provisions and any State or operator variations as shown in Tables 3-1 and 3-2 and Attachment 3.
11. Determine the packing details from the relevant information or packing instruction in Part 4 and any special requirements from Part 2, Chapters 1 to 9 and Part 5, Chapter 1.
12. Select, where permitted, a method of packing from the packing instruction, or ascertain the provisions of the instruction and ensure the packagings to be used meet all the relevant requirements of Part 4, Chapter 1 and Part 6.
13. Prepare the consignment in accordance with all the relevant requirements of paragraphs 9 to 12 above.
14. Ensure all the appropriate labels and markings are affixed to or printed on the packages according to Part 5, Chapters 2 and 3.
15. Make any appropriate advance arrangements in accordance with Part 5, Chapter 1.
16. Prepare the transport documents and complete and sign the dangerous goods transport document in accordance with Part 5, Chapter 4.
17. Offer the complete consignment for transport by air.

### THE SUPPLEMENT TO THE TECHNICAL INSTRUCTIONS

A Supplement to the Technical Instructions provides information on the safe transport of dangerous goods by air that is primarily of interest to States. Publishing this information in a separate document eliminates from the Technical Instructions material which the average user has neither the need nor the desire to know. The size and complexity of the Technical Instructions is thereby reduced and its comprehensibility enhanced. Examples of the subjects dealt with in the Supplement are guidance for the issue of certain exemptions or approvals by States and the reporting of dangerous goods accidents and incidents to ICAO by Contracting States.

The Supplement is published at the same time as the Technical Instructions and is distributed to the aviation administrations of all the Contracting States of ICAO. However, it is recognized that there may be occasions when the information in the Supplement might be helpful to other readers. Copies can be purchased from the Regional Offices of ICAO or from the Headquarters of ICAO using the following address:

### THE 2013-2014 EDITION

The Technical Instructions have been amended to make them as up to date as possible and to clarify, where necessary, the intent of the requirements. Account has been taken of comments received from users throughout the world. This has resulted in numerous minor changes in all parts of the book.

- ≠ It is intended, for the time being, to continue issuing new versions of the Technical Instructions biennially. This is the fourteenth biennial edition of the Technical Instructions and it will be valid for two years, i.e. from 1 January 2013 to 31 December 2014 or until such later time as a new edition becomes valid.
- ≠ The requirements have been amended so as to align them, as far as possible, with the Seventeenth Revised Edition of the United Nations *Recommendations on the Transport of Dangerous Goods* and the *International Atomic Energy Agency (IAEA) Regulations for the Safe Transport of Radioactive Material*, as incorporated therein.
- ≠ The amendments include the following:
- addition of provisions for the carriage of dangerous goods on helicopters (1;1.1, 1;3, 4; Introductory Notes, (Note 11), 7;2, 7;4, 7;7; Supplement pages S-7;2, S-7;4);
  - revision to the exceptions for dangerous goods of the operator (1;2.2.1);
  - addition of provisions for the carriage of lithium batteries contained in equipment in the mail (1;2.3, 1;3, 1;4; Supplement page S-1;3);
  - addition of provisions for competency-based training and assessment (1;4.4);
  - addition of definition for high consequence dangerous goods including radioactive material (1;5.3);
  - extension of responsibilities for incident and accident reporting beyond those of the operator (1;7);
  - revisions to the classification criteria for explosives (2;1.5.2.4) and infectious substances (2;6.3.2.3.7);
  - addition of new requirement for lithium cells and batteries to be manufactured under a quality management programme (2;9.3);
  - revision to provisions for lithium batteries which eliminate many of the exceptions previously provided (3;2, 4;11, (Packing Instructions 965 to 970), 5;3, 7;4)
  - removal of references to gross mass from Table 3-1 and the packing instructions (except when assigned to limited quantities) and addition of a new definition for net quantity (1;3, 3;2, Part 4);
  - revision to provisions for mercury contained in manufactured articles (3;2, 3;3, 4;10);
  - addition of new entries for chemicals under pressure in Table 3-1 and their provisions (3;2, 3;3, 4;4);
  - addition of new entries for electric double layer capacitors in Table 3-1 and their provisions (3;2, 3;3, 4;11);
  - addition of a special provision for neutron radiation detectors containing UN 1008, **Boron trifluoride** (3;3);
  - addition of provisions for “de minimus” quantities of dangerous goods (3;5);
  - extension of provisions for information to the pilot-in-command to personnel with responsibilities for operational control of the aircraft (7;4.1);
  - addition of a new table which includes dangerous goods not required to appear with the information to the pilot-in-command (Table 7-9);

- addition of new provisions for the reporting of dangerous goods occurrences (7;4.6);
- addition of a recommendation for operators to retain a copy of the transport document and the acceptance checklist if a shipment does not pass the acceptance check (7;4.11);
- revision to the structure of Part 8 (Table 8-1);
- revision of passenger provisions for heat-producing articles, avalanche rescue backpacks, portable electronic devices containing lithium batteries, portable electronic devices powered by fuel cells (Table 8-1); and
- addition of new provisions for premixing burner lighters (Table 8-1, Attachment 2).

### ABBREVIATIONS AND SYMBOLS

The abbreviations and symbols in the following table are used throughout the Instructions, or in the particular sections indicated, and have the meanings shown below.

<i>Abbreviation or symbol</i>	<i>Meaning</i>
A/m	amperes per metre
Bq	becquerel
cm	centimetre
°C	degree Celsius
G	gross mass as prepared for transport (as used in column 11 of Table 3-1)
g/m <sup>2</sup>	grams per square metre
Gy	gray
Hz	hertz
IAEA	International Atomic Energy Agency
IP	inner packaging
ISO	the International Organization for Standardization
J/g	joules per gram
J/kg	joules per kilogram
K	kelvin
kg	kilogram
kgf	kilogram-force
kPa	kilopascal
L	litre
LC	lethal concentration
LD	lethal dose
L/kg	litres per kilogram
m	metre
mL	millilitre
mm	millimetre
mS/m	millisiemens per metre
N	newton
n.o.s.	not otherwise specified
Ω/m	ohm per metre
SI	the International System of Units developed by the General Conference of Weights and Measures (Système international d'unités)
Sv	sievert
UN	the United Nations Committee of Experts on the Transport of Dangerous Goods
W/m <sup>2</sup>	watts per square metre
W/m/K	Watts per metre per Kelvin
µm	micrometre
≠	this symbol indicates changed text
+	this symbol indicates new or relocated text
>	this symbol indicates deleted text

## TABLE OF CONTENTS

	<i>Page</i>
<b>Part 1. GENERAL</b>	
<b>Chapter 1. Scope and applicability .....</b>	<b>1-1-1</b>
1.1 General applicability.....	1-1-1
1.2 General transport requirements .....	1-1-3
1.3 Application of standards.....	1-1-3
1.4 Dangerous goods packages opened by customs and other authorities .....	1-1-3
1.5 Relationship to Annex 18 .....	1-1-3
1.6 Requests for amendments to the Technical Instructions.....	1-1-3
<b>Chapter 2. Limitation of dangerous goods on aircraft .....</b>	<b>1-2-1</b>
2.1 Dangerous goods forbidden for transport by air under any circumstance .....	1-2-1
2.2 Exceptions for dangerous goods of the operator.....	1-2-1
2.3 Transport of dangerous goods by post.....	1-2-2
2.4 Dangerous goods in excepted quantities.....	1-2-2
2.5 Exceptions for dangerous goods packed in limited quantities.....	1-2-2
<b>Chapter 3. General information .....</b>	<b>1-3-1</b>
3.1 Definitions .....	1-3-1
3.2 Units of measurement and conversion factors .....	1-3-8
<b>Chapter 4. Training .....</b>	<b>1-4-1</b>
4.1 Establishment of training programmes .....	1-4-1
4.2 Training curricula .....	1-4-1

<b>Chapter 8. Class 6 — Toxic and infectious substances .....</b>	<b>4-8-1</b>
8.1 Packing instructions .....	4-8-1
<b>Chapter 9. Class 7 — Radioactive material.....</b>	<b>4-9-1</b>
9.1 General .....	4-9-1
9.2 Requirements and controls for transport of LSA material and SCO.....	4-9-2
9.3 Packages containing fissile material.....	4-9-2
<b>Chapter 10. Class 8 — Corrosive substances .....</b>	<b>4-10-1</b>
10.1 Packing instructions .....	4-10-1
<b>Chapter 11. Class 9 — Miscellaneous dangerous goods.....</b>	<b>4-11-1</b>

## Part 5. SHIPPER'S RESPONSIBILITIES

<b>Chapter 1. General.....</b>	<b>5-1-1</b>
1.1 General requirements .....	5-1-1
1.2 General provisions for Class 7.....	5-1-2
1.3 Information to employees.....	5-1-1
1.4 Training .....	5-1-1
1.5 Salvage packagings.....	5-1-5
1.6 Empty packagings.....	5-1-6
1.7 Mixed packing .....	5-1-6
<b>Chapter 2. Package markings.....</b>	<b>5-2-1</b>
2.1 The requirement to mark.....	5-2-1
2.2 Application of markings.....	5-2-1
2.3 Prohibited marking .....	5-2-1
2.4 Marking specifications and requirements .....	5-2-1
2.5 Languages to be used .....	5-2-4
<b>Chapter 3. Labelling.....</b>	<b>5-3-1</b>
3.1 The requirement to label .....	5-3-1
3.2 Application of labels .....	5-3-1
3.3 Labelling of overpacks .....	5-3-3
3.4 Prohibited labelling.....	5-3-3
3.5 Label specifications.....	5-3-3
3.6 Placarding of large freight containers containing radioactive material .....	5-3-5
<b>Chapter 4. Documentation .....</b>	<b>5-4-1</b>
4.1 Dangerous goods transport information .....	5-4-1
4.2 Air waybill.....	5-4
4.3 Additional documentation for other than radioactive material .....	5-4-5
4.4 Retention of dangerous goods transport information .....	5-4-6

## Part 6. PACKAGING NOMENCLATURE, MARKING, REQUIREMENTS AND TESTS

<b>Chapter 1. Applicability, nomenclature and codes .....</b>	<b>6-1-1</b>
1.1 Applicability .....	6-1-1
1.2 Codes for designating types of packagings.....	6-1-1
1.3 Index of packagings.....	6-1-2
<b>Chapter 2. Marking of packagings other than inner packagings.....</b>	<b>6-2-1</b>
Introductory Notes.....	6-2-1
2.1 Marking requirements for packagings other than inner packagings.....	6-2-1

	<i>Page</i>
2.2 Packaging markings for infectious substances.....	6-2-3
2.3 Packaging markings for salvage packagings .....	6-2-3
2.4 Packaging markings for intermediate bulk containers .....	6-2-3
<b>Chapter 3. Requirements for packagings .....</b>	<b>6-3-1</b>
3.1 Requirements for packagings other than inner packagings .....	6-3-1
3.2 Requirements for inner packagings .....	6-3-8
<b>Chapter 4. Packaging performance tests .....</b>	<b>6-4-1</b>
Introductory Notes.....	6-4-1
4.1 Performance and frequency of tests.....	6-4-1
4.2 Preparation of packagings for testing .....	6-4-2
4.3 Drop test.....	6-4-2
4.4 Leakproofness test.....	6-4-4
4.5 Internal pressure (hydraulic) test .....	6-4-4
4.6 Stacking test.....	6-4-5
4.7 Test report.....	6-4-5
4.8 Test requirements for salvage packaging.....	6-4-6
<b>Chapter 5. Requirements for the construction and testing of cylinders and closed cryogenic receptacles, aerosol dispensers and small receptacles containing gas (gas cartridges) and fuel cell cartridges containing liquefied flammable gas .....</b>	<b>6-5-1</b>
5.1 General requirements .....	6-5-1
5.2 Requirements for UN cylinders and closed cryogenic receptacles .....	6-5-5
5.3 Requirements for non-UN cylinders and non-UN closed cryogenic receptacles .....	6-5-17
5.4 Requirements for aerosol dispensers, small receptacles containing gas (gas cartridges) and fuel cell cartridges containing liquefied flammable gas .....	6-5-17
<b>Chapter 6. Packagings for infectious substances of Category A .....</b>	<b>6-6-1</b>
6.1 General .....	6-6-1
6.2 Requirements for packagings .....	6-6-1
6.3 Code for designating types of packagings.....	6-6-1
6.4 Marking .....	6-6-1
6.5 Test requirements for packagings .....	6-6-2
<b>Chapter 7. Requirements for the construction, testing and approval of packages and material of Class 7.....</b>	<b>6-7-1</b>
7.1 General requirements .....	6-7-1
7.2 Additional requirements for packages transported by air .....	6-7-1
7.3 Requirements for excepted packages .....	6-7-1
7.4 Requirements for industrial packages .....	6-7-2
7.5 Requirements for packages containing uranium hexafluoride .....	6-7-2
7.6 Requirements for Type A packages .....	6-7-3
7.7 Requirements for Type B(U) packages .....	6-7-4
7.8 Requirements for Type B(M) packages .....	6-7-5
7.9 Requirements for Type C packages .....	6-7-5
7.10 Requirements for packages containing fissile material .....	6-7-6
7.11 Test procedures and demonstration of compliance.....	6-7-8
7.12 Testing the integrity of the containment system and shielding and evaluating criticality safety.....	6-7-8
7.13 Target for drop tests.....	6-7-8
7.14 Tests for demonstrating ability to withstand normal conditions of transport.....	6-7-8
7.15 Additional tests for Type A packages designed for liquids and gases .....	6-7-9
7.16 Tests for demonstrating the ability to withstand accident conditions in transport .....	6-7-10
7.17 Enhanced water immersion test for Type B(U) and Type B(M) packages containing more than 10 <sup>5</sup> A <sub>2</sub> , and Type C packages .....	6-7-10
7.18 Water leakage test for packages containing fissile material.....	6-7-10
7.19 Tests for Type C packages .....	6-7-11
7.20 Tests for packagings designed to contain uranium hexafluoride .....	6-7-11
7.21 Approvals of package designs and materials .....	6-7-11
7.22 Registration of serial numbers and validation.....	6-7-12
7.23 Transitional measures for Class 7 .....	6-7-12

	<i>Page</i>
<b>Part 7. OPERATOR'S RESPONSIBILITIES</b>	
Introductory Note .....	7-(i)
<b>Chapter 1. Acceptance procedures .....</b>	<b>7-1-1</b>
1.1 Cargo acceptance procedures .....	7-1-1
1.2 Acceptance of dangerous goods by operators .....	7-1-1
1.3 The acceptance check .....	7-1-1
1.4 Acceptance of freight containers and unit load devices .....	7-1-2
1.5 Special responsibilities in accepting infectious substances .....	7-1-2
1.6 Undeliverable consignments of radioactive material .....	7-1-2
<b>Chapter 2. Storage and loading .....</b>	<b>7-2-1</b>
2.1 Loading restrictions on the flight deck and for passenger aircraft .....	7-2-1
2.2 Incompatible dangerous goods .....	7-2-1
2.3 Handling and loading of packages containing liquid dangerous goods .....	7-2-3
2.4 Loading and securing of dangerous goods .....	7-2-3
2.5 Damaged packages of dangerous goods .....	7-2-4
2.6 Visibility of markings and labels .....	7-2-4
2.7 Replacement of labels .....	7-2-4
2.8 Identification of unit load devices containing dangerous goods .....	7-2-4
2.9 Stowage of toxic and infectious substances .....	7-2-4
2.10 Special provisions applicable to the carriage of radioactive material .....	7-2-4
2.11 Loading of magnetized materials .....	7-2-4
2.12 Loading of dry ice .....	7-2-9
2.13 Loading of UN 2211, polymeric beads, expandable or UN 3314, plastics moulding compound .....	7-2-9
2.14 Handling of self-reactive substances and organic peroxides .....	7-2-9
2.15 Handling and loading of intermediate bulk containers (IBCs) .....	7-2-9
<b>Chapter 3. Inspection and decontamination .....</b>	<b>7-3-1</b>
3.1 Inspection for damage or leakage .....	7-3-1
3.2 Damaged or leaking packages of radioactive material, contaminated packagings .....	7-3-1
3.3 Dealing with suspected contaminated baggage or cargo .....	7-3-2
<b>Chapter 4. Provision of information .....</b>	<b>7-4-1</b>
Introductory Note .....	7-4-1
4.1 Information to the pilot-in-command .....	7-4-1
4.2 Information to be provided to employees .....	7-4-3
4.3 Information to be provided by the pilot-in-command in case of in-flight emergency .....	7-4-3
4.4 Reporting of dangerous goods accidents and incidents .....	7-4-3
4.5 Reporting of undeclared or misdeclared dangerous goods .....	7-4-3
4.6 Reporting of dangerous goods occurrences .....	7-4-4
4.7 Information by the operator in case of an aircraft accident or incident .....	7-4-4
4.8 Cargo acceptance areas — Provision of information .....	7-4-4
4.9 Emergency response information .....	7-4-4
4.10 Training .....	7-4-4
4.11 Retention of documents or information .....	7-4-5
<b>Chapter 5. Provisions concerning passengers and crew .....</b>	<b>7-5-1</b>
5.1 Information to passengers .....	7-5-1
5.2 Passenger check-in procedures .....	7-5-1
<b>Chapter 6. Provisions to aid recognition of undeclared dangerous goods .....</b>	<b>7-6-1</b>
<b>Chapter 7. Helicopter operations .....</b>	<b>7-7-1</b>
<b>Part 8. PROVISIONS CONCERNING PASSENGERS AND CREW</b>	
<b>Chapter 1. Provisions for dangerous goods carried by passengers or crew .....</b>	<b>8-1-1</b>
1.1 Dangerous goods carried by passengers or crew .....	8-1-1

**ATTACHMENTS****ATTACHMENT 1. Lists of proper shipping names**

Chapter 1. List of UN numbers with associated proper shipping names .....	A1-1-1
Chapter 2. List of n.o.s. and generic proper shipping names .....	A1-2-1

**ATTACHMENT 2. Glossary of terms**

Glossary of terms .....	A2-1
-------------------------	------

**ATTACHMENT 3. Notified variations from the Instructions**

Chapter 1. Variations notified by States .....	A3-1-1
Chapter 2. Variations notified by airline operators .....	A3-2-1

**ATTACHMENT 4. Index and list of tables and figures**

Index .....	A4-1
List of tables.....	A4-13
List of figures .....	A4-14

## ATTACHMENT

ATTACHMENT 1: List of major funding partners

Chapter 1: List of major funding partners  
 Chapter 2: List of major funding partners

ATTACHMENT 2: Quality of work

Chapter 1: Quality of work  
 Chapter 2: Quality of work

ATTACHMENT 3: Funded activities from the foundation

Chapter 1: Funded activities from the foundation  
 Chapter 2: Funded activities from the foundation

ATTACHMENT 4: Funded activities from the foundation
